Pagrindinės savybės

- ✓ Universal smart card reader
- ✓ Healthcare, Government
- ✓ Interface: USB Type-A
- ✓ Power source: USB
- ✓ Black, White

Aprašymas

Full In -House Development

Complete control over electronics and firmware enables superior customer support and long -term product independence.

Firmware Update Capability

Flash -based controller allows post -deployment updates and security adjustments.

Driverless Standard Integration

Native support via Microsoft CCID and Linux pcsc -lite — no proprietary driver required.

Future - Ready Architecture

Flexible firmware layer enables adaptation to evolving regulatory and security requirements.

Designed for High - Security Environments

Built for government, defense, and regulated organizations requiring reliability, compliance, and lifecycle stability.

Smart, stable, and operable with one hand: The Smart Terminal ST -1150 reads and writes your chip cards with extremely low power consumption.

Whether for access control, networking, logon, or chip card -based Internet transactions, the Smart Terminal with USB connection provides simple and reliable support for protecting your sensitive data.

Support for international standards such as ISO/IEC 7816 and CCID makes this Smart Terminal universally applicable .

It is designed for GSA sales to government agencies , the military , their vendors and suppliers as well as other organizations requiring end products which meet the manufacturing requirements according to the U.S. Trade Agreement Act Specifications (TAA).

The solid base of the smart card terminal ensures efficient one-handed operation .

Techninė specifikacija
