Pagrindinės savybės

- ✓ Internal
- ✓ Host interface: PCIe
- ✓ Output interface: Fiber
- ✓ 8 Gbit/s

Aprašymas

Fibre Channel Host Bus Adapters (HBA) enable data exchange over large distances and extend your existing FUJITSU server systems by including communication interfaces using high-speed communication technology. All connections are redundant and hot-pluggable.

The combination of hardware and software exemplifies the high-performance quality of communication.

The number of system restarts is reduced thanks to optimized software and extended error check functions help improve the integrity of your company's information.

Techninė specifikacija

Specifications

Sandėlio grupė Netzwerkkarten [+485][-7]

Ports & interfaces

Host interface	PCIe
Output interface	Fiber
Expansion card form factor	Full-height
Expansion card standard	PCIe 3.0

Fiber optic connector	LC
-----------------------	----

Design

Internal	Yes
----------	-----

Features

Data transfer rate (max)	8 Gbit/s
--------------------------	----------

Power

Power consumption (typical)	9.3 W
-----------------------------	-------

Operational conditions

Operating temperature (T-T)	0 - 55 °C
-----------------------------	-----------

Storage temperature (T-T)	-40 - 70 °C
---------------------------	-------------
