NEEWER x660 PRO II LED light

Create professional shots, atmospheric live streams, and stunning video content with a complete lighting kit that gives you total creative freedom. The NEEWER 660 PRO II RGB is a set of two LED lights that offer a wide range of color adjustments and smart wireless control, allowing you to easily tailor the light's character to any scene. An advanced cooling system and precise parameter control guarantee stable, flicker-free operation without unwanted color shifts. The kit also includes adjustable tripods, barn doors, and diffusers, which allow for precise light shaping both in the studio and on location.

Precise RGB light with smooth adjustment

The 660 PRO II RGB model is equipped with an improved lighting and cooling control system that maintains a constant power output of 50 W and eliminates the problem of flickering and color shifts during operation. The light offers brightness control ranging from 1% to 100%, and even at the lowest setting, it maintains an actual power output of 1%, allowing you to build the scene's

atmosphere with great precision. You also have access to a color temperature range from 3200 K to 5600 K and a full 360° RGB color range, allowing you to freely experiment with lighting. Regardless of the selected color or color temperature, the power and brightness remain stable, ensuring a consistent effect during video recording and photography.

Stunning scenes and professional image quality

The high color rendering index (CRI 97+) ensures that the lighting faithfully reproduces the colors of skin, clothing, and set elements. With a brightness of up to 7,000 lux at a distance of 0.5 m, it effectively illuminates a photo set, streaming setup, or video conferencing space. The lamp also offers 9 preset scene modes that help you quickly create a unique atmosphere without having to manually adjust settings. You can choose from effects such as police car, ambulance, fire truck, fireworks, party, candlelight, lightning, paparazzi, and TV screen. This makes it easy to give your recordings a more cinematic and dynamic feel.

Smart control via the app

Bluetooth connectivity allows you to conveniently control the lights using the NEEWER mobile app. Simply download the app to a smartphone running Android 4.3 or later, or iOS 11.1, and enjoy wireless control of lighting settings from a distance of up to 15 meters. The app lets you control a single light or several at once using channels 1–8 or ALL mode. The ability to save two favorite presets further speeds up your workflow and makes it easy to quickly return to previously configured settings.

Ready for use in any conditions

The sturdy aluminum construction effectively dissipates heat, which increases comfort during use and allows you to use the lights for longer periods. The lights can be powered in two ways—using the included AC adapter for indoor use, or using NP-F550 and NP-F970 lithium-ion batteries, which are ideal for outdoor photography and videography. The kit also includes a practical carrying case, making it easy to store and conveniently transport the entire set.

Stable tripods and flexible lighting setup

The two tripods included in the kit, with adjustable heights ranging from 92 to 200 cm, provide stable support for the lights during use. The U-shaped mount allows for secure attachment of the LED panel and tilt adjustment of up to 180°, enabling you to precisely direct the light exactly where it's needed. The four-panel shutters help control the angle of light, and the removable diffuser softens the lighting and gives the scene a more natural, professional look.

Included in the set
