Aprašymas

HUION Note E X50 Tablet

The HUION Note E is a compact Android tablet with an 8.4-inch screen, designed for digital note-taking, reading, drawing, and organizing daily tasks. The display, with a resolution of 1920 × 1200 px, a pixel density of 270 PPI, and a refresh rate of 60 Hz ensures a crisp image, while the matte surface, made using AG nano-etching technology, provides a writing experience similar to that of writing on paper. The package includes a battery-free, magnetic PW510 stylus with PenTech 3.0 technology, supporting 8,192 levels of pressure sensitivity, tilt angle recognition, and a reporting rate of over 400 PPS. The tablet also offers over 6 GB of RAM, 128 GB of internal storage, an 8-core processor, a 7.4 mm-thick chassis, and a lightweight design at 348 g, making it an excellent choice as a mobile digital notebook.

PenTech 3.0 Stylus – Write Without Charging

The included PW510 stylus does not require batteries, so it can be used without additional charging. PenTech 3.0 technology, the felt tip, and the textured screen surface provide a more natural feel when taking notes and sketching, while the 1.6-mm tip and 9-mm grip make the stylus similar in size to a traditional ballpoint pen. Support for 8,192 levels of pressure sensitivity and tilt angle recognition allows for a more accurate representation of your pen strokes, and a reporting rate of over 400 PPS ensures a quick response to hand movements. When you’re done working, you can magnetically attach the stylus to the tablet, making it easier to keep it within reach at all times.

Matte Soft-Light display with a resolution of 1920 × 1200

The HUION Note E features a 16:10 aspect ratio screen with a resolution of 1920 × 1200 px and a pixel density of 270 PPI, ensuring that text, notes, and drawings are clear and legible. AG nano-etching technology gives the surface a matte finish and reduces glare, while providing a distinctive resistance when moving the stylus, designed to mimic the feel of writing on paper. Full lamination further enhances the natural writing experience, while the 60 Hz refresh rate ensures smooth content display.

Comfort while reading, writing, and drawing

The Soft-Light screen uses DC dimming and reduces blue light emission, which enhances comfort during extended reading or note-taking. The coating reduces fingerprints and smudges, helping to keep the display surface clean and clear. The panel displays 16.7 million colors and achieves a brightness of 300 nits, so in addition to text notes, it also handles colorful documents, diagrams, and illustrations well.

Notes, Tasks, and Cloud Backups

The simplified home screen allows you to quickly access note-taking and task management, enabling the HUION Note E to serve as a digital notebook during meetings, study sessions, and daily planning. Handwritten information in the quick notes area can be recognized and converted into tasks, and selected portions of existing notes can also be added to a to-do list. Tasks can be organized by category and priority, and you can set deadlines, recurring reminders, and alarm notifications for them. One-click backup support for Google Drive, OneDrive, and Dropbox makes it even easier to keep your saved content secure.

Mobile Format and Everyday Performance

The 8.4-inch (approx. 21.3 cm) screen maintains a size similar to an A5 notebook, while the case—just 7.4 mm thick and weighing 348 g—makes it easy to carry the device in a bag or backpack. The tablet is equipped with an 8-core processor and 6 GB of RAM, ensuring adequate performance when taking notes and using its features. The 128 GB of internal storage provides plenty of space for notes, documents, and other materials, allowing the HUION Note E to accompany the user both at their desk and while working or studying away from home.

Included in the set

- HUION Note E tablet
- HUION PW510 PenTech 3.0 stylus
