Aprašymas

Real-Time CPU Temperature Display: Built-in display on the pump head pulls temperature data directly from the BIOS for instant monitoring. 360-Degree Rotatable Magnetic Head: Pump cover rotates a full 360 degrees to keep logos and designs upright regardless of tube orientation. Dual-Path Water Pump Engine: Separates coolant intake and discharge into two distinct flow paths to maximize thermal efficiency and prevent pump overload. Broad Socket Compatibility: Native support for Intel LGA1851, LGA1700, LGA1200, LGA115X, and AMD AM5/AM4 socket platforms. Aerodynamic Shark Fin Fan Blades: Shroud-ring blade structure reduces air turbulence, blade tip loss, and noise for focused directional airflow. Single-Frame Multi-Fan Unit: Integrated 2-in-1 or 3-in-1 fan frame significantly reduces cable clutter and simplifies radiator installation. 100% Pure Copper Contact Plate: High-grade copper base combined with included ZM-STC10 high-conductivity thermal paste ensures rapid CPU heat transfer. Aluminum Radiator & PWM Sync: High-density aluminum radiator features anti-vibration rubber mounts, smart PWM fan speed control, and 5V ARGB motherboard lighting sync.
