### Aprašymas

**High Thermal Conductivity:** Efficiently transfers heat away from CPUs and computer chips to maximize cooling performance. **Non-Conductive & Safe:** Formulated with zero electrical conductivity to prevent short circuits and protect sensitive internal components. **10-Year Extended Durability:** Fills microscopic gaps between the processor and heatsink to maintain thermal performance for up to a decade. **Syringe Applicator with Rubber Cap:** Convenient syringe design ensures precise application, while the airtight rubber cap prevents the compound from drying out between uses. **Visual Syringe Measurement Scale:** Clear graduation markings on the barrel allow users to easily track and control the amount of paste applied. **Optimum Viscosity & Particle Density:** Engineered particle size allows smooth, uniform spreading across various chip surfaces under cooler mounting pressure. **RoHS-Compliant & Eco-Friendly:** Made with environmentally safe, non-toxic materials that fully comply with hazardous substance standards. **Width (mm): 110 | Length (mm): 23 | Height (mm): 14 | Net Weight (g): 2 | Color: Gray | Operation Temperature (°C): -40 ~ 150 | Density (g/cm³): 2.6 | Materials: Polydimethylsiloxane, Zinc Oxide, Aluminum Oxide | Thermal conductivity (W/m·K): 18**
