Aprašymas

Smartmi Evaporative Humidifier 3 Lite

Take care of the air quality in your home with the Smartmi Evaporative Humidifier 3 Lite, a next-generation evaporative humidifier that combines advanced technology with exceptional ease of use. It not only improves the humidity of the air, but also adapts its operation to the needs of your environment, providing ideal conditions for rest, work or sleep. No matter where you place it - in the living room, bedroom or children's room - you will feel the difference.

Natural humidity without the fog effect

Smartmi Evaporative Humidifier 3 Lite uses advanced evaporative technology that mimics natural water evaporation to subtly and effectively humidify the air. No artificial fog, no residue on your furniture, just fresh and clean air! This makes the humidifier ideal for rooms with children, pregnant women or allergy sufferers, minimizing the risk of irritation or allergic reactions.

Air clean as never before

Take care of the quality of the air you breathe in! The humidifier is equipped with a special filtration system that catches small particles of dust and pollutants, so that the air is not only humidified, but also clean. This is an excellent solution for allergy sufferers who value not only comfort, but above all health.

Maximum efficiency, minimum noise

You don't have to choose between efficiency and silence. Smartmi Evaporative Humidifier 3 Lite can run all night without disturbing your sleep. With a capacity of 280 ml/h, it will easily humidify rooms of up to 40 m², and thanks to its large 4-liter water tank, it doesn't need frequent refilling. Enjoy fresh air for up to 14 hours without unnecessary interruptions!

Constant humidity, reliable protection

Always perfect humidity - without your intervention! The humidifier automatically monitors ambient conditions and adjusts its operation to constantly maintain the humidity level at the ideal 55%. Smartmi Evaporative Humidifier 3 Lite not only takes care of your comfort, but also your safety. If the water level in the tank drops too low or the water container is pulled out, the unit automatically shuts off to avoid damage.

Full control

Controlling the Smartmi Evaporative Humidifier 3 Lite is a pleasure - all thanks to its integration with the Mi Home app. From anywhere, you can monitor and adjust humidity levels, turn the device on or off, and set operating schedules to tailor the humidifier to your lifestyle. The device is also compatible with voice assistants - Hey Google, Amazon Alexa and Yandex Alice. So you can control the humidifier hands-free with simple voice commands!

Easy refilling and quick cleaning

Using a humidifier has never been easier! Thanks to the easy refill system, you can refill the water in seconds - without even having to turn off the device. And when it's time for cleaning, the removable cover and modular design make maintenance quick and hassle-free. All this so you can enjoy its performance for as long as possible, without unnecessary complications.
