Aprašymas

SJCAM SJ20 Charging Combo Action Camera

The SJCAM SJ20 features two lenses designed for recording in different lighting conditions—a daytime F2.0 lens and a nighttime F1.3 lens—and allows you to record video at resolutions up to 4K/30 fps. Stabilization based on a 6-axis gyroscope and EIS helps maintain smooth footage while in motion, and the wide 135° field of view and 8× digital zoom provide greater freedom in framing. The camera also features two screens—a 2.29" main touchscreen and a 1.3" front screen—water resistance up to 5 m with a protective frame, and 5G Wi-Fi connectivity with the SJCAM Zone app. The built-in 800 mAh battery, along with an additional 1050 mAh battery and a battery-powered selfie stick, provides up to 480 minutes of runtime.

Two Lenses and 4K Recording

The SJCAM SJ20 is equipped with two lenses designed for different lighting conditions. The daytime lens with an F2.0 aperture captures clear, detailed images in well-lit conditions, while the F1.3 night lens increases the amount of light captured, enabling recording even in low-light conditions. The large F1.3 aperture captures more than twice as much light as other action cameras featured in promotional materials. Both lenses support recording at up to 4K resolution at 30 fps, preserving details and vibrant colors in both bright light and when switching to the night lens. The capabilities of the night lens are complemented by SuperNight mode, which helps produce clearer footage in very low light and makes better use of available light when recording after dark.

Smoother Footage While Moving

A combination of a 6-axis gyroscope and electronic image stabilization (EIS) ensures smooth footage. The system counteracts vibrations caused by camera movement, helping to maintain a steadier image in dynamic situations. As a result, the SJ20 can capture smoother footage during activities where it’s difficult to keep the camera still.

Wide-angle view and digital zoom

The 135° field of view lets you capture a wide scene in a single shot, which is useful for capturing landscapes and outdoor activities, among other things. When you want to focus on a specific element, you can use the up to 8× digital zoom. This combination gives you greater freedom to switch between wide shots and close-ups.

Two Screens for More Convenient Framing

The SJ20 features a 2.29" main touchscreen that makes it easy to operate functions and monitor the footage you’re recording. On the front, there’s an additional 1.3" screen that provides a preview when filming yourself. The dual-screen design makes framing more convenient both when shooting from behind the camera and when the lens is facing the user.

Up to 8 hours of battery life

The SJCAM SJ20 is equipped with an 800 mAh battery, allowing for convenient everyday use. An additional 1050 mAh battery provides even more power, and when combined with a battery-powered selfie stick, the runtime extends to 8 hours, or 480 minutes. This makes it ideal for trips and long recording sessions, minimizing the need to frequently pause recording.

Ready for Water

The SJCAM SJ20 is waterproof to a depth of 5 m when used with a protective case, making it suitable for water-based activities. When placed in a waterproof housing, this range increases to as much as 40 m. This allows you to take the camera on underwater expeditions and capture footage in conditions where the standard design would not provide adequate protection.

Connect to the SJCAM Zone App

5G Wi-Fi connectivity allows you to connect the SJ20 to your smartphone and use the SJCAM Zone app. From within the app, you can view a real-time preview, download recordings, and easily share them. The app also provides access to creative recording modes, expanding the camera’s capabilities when controlled via a mobile device.

More Ways to Create Content

The SJCAM SJ20 offers additional features useful in various recording scenarios. Car Mode lets you use the camera while driving, and Time Lapse lets you create impressive time-lapse videos. Vertical recording is also available, allowing you to capture footage in an orientation suited to the vertical aspect ratio.

Included in the package

- Camera x1
- Selfie stick with battery
- Battery x1
- Waterproof case x1
- Mounting brackets x2
- USB cable x1
- Mounting base x1
- Screw x1
- Helmet mounting base x2
- Adapter x2
- 3M adhesive sticker x2
