Aprašymas

SJCAM C400 Pocket Action Camera (black)

The SJCAM C400 combines a compact design with 4K Ultra HD recording at 30 fps, making it ideal for both everyday vlogs and dynamic POV shots. The stabilization system, which uses a 6-axis gyroscope and the Steady Motion V1.0 algorithm, helps reduce shake and ensures smooth footage when recording on the move, while the battery offers approximately 172 minutes of runtime. The Snap-On POV system eliminates the need for bulky mounts—simply clip on the camera to start recording from a first-person perspective right away.

Detailed 4K/30 fps Recordings

The SJCAM C400 Pocket records video in 4K Ultra HD at 30 fps, allowing you to capture a high level of detail and vivid colors in your footage. These capabilities are well-suited to the needs of everyday vlogging and capturing important moments.

Steady Motion V1.0 for Smoother Footage

Image stabilization is provided by a 6-axis gyroscope working in conjunction with the Steady Motion V1.0 algorithm. The system minimizes the impact of camera shake on the recorded footage, helping to achieve smoother footage when recording on the move. As a result, dynamic scenes can remain stable and clear even in challenging conditions.

More Creative Possibilities

The SJCAM C400 Pocket offers additional modes and features that let you tailor your workflow to the type of content you’re creating. Time Lapse lets you capture time-lapse footage, while Slow Motion allows you to achieve a slow-motion effect. The camera also supports live streaming and webcam functionality, expanding its range of applications beyond standard video recording.

Included in the package
