Aprašymas

SJCAM M60 3CH Dash Cam

The SJCAM M60 3CH simultaneously records footage from the front, rear, and inside the car, providing a comprehensive record of your trip. The front camera allows recording in 4K (3840 × 2160) at 30 fps or 2K (2560 × 1440) at up to 60 fps, while when all three cameras are in use, 1080p (1920 × 1080) recording at 30 fps is available. The wide fields of view are 170° at the front, 160° at the rear, and 150° inside the vehicle. The system is complemented by GPS and BEIDOU, a G-sensor, HDR, parking mode, and loop recording, as well as emergency, time-lapse, and motion-detection recording.

Three Cameras, Wide View

The 3CH configuration allows for simultaneous monitoring of the road ahead, the area behind the vehicle, and the interior of the cabin. The front camera uses a 1/1.8" CMOS sensor, while the rear and interior cameras use 1/2.8" CMOS sensors. All three lenses offer a bright F/1.8 aperture, while the front lens can also be adjusted within a range of up to 75° to properly frame the recorded area. Recordings in up to 4K resolution allow you to capture the flow of traffic, the positions of vehicles, and surrounding elements in greater detail.

Protecting Important Recordings

The SJCAM M60 3CH uses a G-Sensor and collision detection system to automatically protect footage related to an impact from being accidentally overwritten. Upon detecting a collision, the device can also emit an audible alert to notify the driver of the incident. Emergency recording, loop

recording, and motion detection help capture various situations during both everyday driving and more unpredictable conditions.

GPS and Parking Protection

Support for GPS and BEIDOU systems allows for the recording of information regarding location, speed, and the route traveled, providing additional data when reviewing recordings later. Based on the information provided, the vehicle’s position can be pinpointed on a map with an accuracy of one meter. Parking mode, on the other hand, allows you to detect incidents even while the vehicle is parked, and time-lapse recording, motion detection, and the G-Sensor extend the car’s protection beyond just driving.

Included in the set

- Front camera with GPS module
- USB Type-C cable
- Car charger
- Cable management tool
- Memory card reader
- 2x electrostatic stickers
- 2x mounting tape for the front mount
- 6x cable clips
- Interior camera
- Rear camera
- Interior camera cable (0.6 m)
- Power adapter for parking mode
- Rear camera cable (6 m)
- User manual

Model	SJCAM M60 3CH
Number of channels	3
Front camera resolution	4K 3840 × 2160 30 fps, 2K 2560 × 1440 60/30 fps, 1080p 1920 × 1080 30 fps
Rear Camera Resolution	1080p 1920 × 1080 30 fps
Internal Camera Resolution	1080p 1920 × 1080 30 fps
Aspect ratio	16:9
Front camera sensor	1/1.8" CMOS
Rear camera sensor	1/2.8" CMOS
Interior camera sensor	1/2.8" CMOS
Front camera field of view	170°
Rear camera field of view	160°
Interior camera field of view	150°
Front camera aperture	F/1.8
Rear camera aperture	F/1.8
Interior camera aperture	F/1.8
Screen	2.0" TFT 320 × 240
