Aprašymas

Freewell Brandon Li 86mm Variable Density ND/CPL Filter Set

The Freewell Brandon Li Cine Pro Kit 86 mm is a comprehensive filter set from the Cinema series, designed for lenses with an 86 mm thread and for use with larger photographic and film lenses. The kit combines a 1–5-stop VND filter with an independently adjustable CPL, an additional ND32 filter that extends the light reduction range to 6–10 stops, and a 1/4 Cine Glow Mist filter that provides a subtle softening effect. The entire system uses a magnetic mounting system with a mechanical lock, and the set also includes an 86 mm base ring, front and rear caps, and storage and cleaning accessories.

Independently Adjustable VND and CPL

The main module combines a variable ND filter with a CPL polarizing filter, but each of these functions can be adjusted separately. The black ring allows you to adjust the VND density within a range of 1–5 stops, while the green ring is used to set the polarization and reduce reflections on water, glass, and other non-metallic surfaces, among others. This design allows you to first adjust the exposure to the scene and then independently set the polarization level without adding a separate CPL filter.

Range from 1 to 10 degrees with the ND32 filter

The VND/CPL module itself offers adjustment from 1 to 5 degrees, while attaching the included ND32 filter extends the operating range to 6–10 degrees. The ND32 can also be used on its own on an 86 mm base ring as a fixed 5-stop reduction filter, which increases the number of possible kit configurations. Such a wide range makes it easier to maintain your desired shutter speed and aperture settings in both soft light and bright daylight conditions.

Cine Glow Mist 1/4 and Quick Magnetic System

The Cine Pro version differs from the basic Cine Kit by including the Cine Glow Mist 1/4 filter, which gently diffuses bright areas of the frame, softens highlights, and helps achieve a gentler, more cinematic look. The Glow Mist filter can be used directly with the base ring or magnetically attached to

the VND/CPL module, allowing you to quickly change the look of your image without having to reconfigure the entire setup. The mounting system uses magnets for quick filter attachment and a short twist to mechanically lock it in place, reducing the risk of accidental detachment while shooting on the move.

Larger Cine Design and Color Control

The main VND/CPL module has an outer diameter of 109.5 mm, a thickness of 7.6 mm, and weighs 62.2 g, making it suitable for use with larger lenses. The optical system utilizes 18-layer optical coatings and the True Color / Anti-Color Shift Layer technology, which is designed to minimize unwanted color shifts when adjusting the filter density. The front cover is additionally equipped with an integrated gray card for white balance control, and the Cine system itself is compatible with dedicated 82, 86, and 95 mm Cine rings.

Included in the set

- Cine VND 1-5 / CPL module
- Cine ND32 filter
- Cine Glow Mist 1/4 filter
- Cine 86 mm base ring
- Front filter hood
- 86 mm rear hood
- Protective filter case
- Individual case
- Clip accessory
- Cleaning cloth

Manufacturer	Freewell
Model	Cine Pro Kit 86 mm
Kit Size	86 mm
Type	magnetic VND/CPL system
VND/CPL Range	1-5 stops
Range with ND32 Filter	6-10 stops
Full Light Reduction Range	1-10 stops
ND32 filter	5-stop fixed reduction
Polarizing filter	CPL with independent adjustment
Effect filter	Cine Glow Mist 1/4
Mount	Magnetic with mechanical twist-lock
Base ring	Cine 86 mm
Compatible Cine rings available separately	82 mm, 86 mm, 95 mm
Outer diameter of VND/CPL Cine	109.5 mm
Cine VND/CPL thickness	7.6 mm
Cine VND/CPL weight	62.2 g
Cine ND32 outer diameter	109.5 mm
Cine ND32 thickness	3.8 mm
Cine ND32 weight	48.1 g

Outer Diameter of Glow Mist 1/4 Cine	109.5 mm
Thickness of Glow Mist 1/4 Cine	3.8 mm
Weight of Glow Mist 1/4 Cine	46 g
Optical Coatings	18-layer multi-coating
Color Technology	True Color / Anti-Color Shift Layer
