Aprašymas

Telesin protective case with handle for DJI Osmo Action 6

The protective case designed for the DJI Osmo Action 6 combines a metal body with an ergonomic grip, creating a complete solution for comfortable operation of the camera. The aircraft-grade aluminum used is responsible for solid protection and shock resistance, while the textured surface guarantees a secure grip. The design has been refined for convenient shutter operation, quick access to the battery, and easy mounting of additional accessories, so that the equipment is ready to record in no time.

Aerospace-grade aluminum construction

The body of the housing is made of aircraft-grade aluminum, precision-machined using CNC technology. This design provides high resistance to shock and impact, protecting the camera from the effects of heavy use. In addition, the interior of the accessory is lined with silicone pads that stabilize the device and protect it from scratches.

Ergonomic grip

The integrated grip has a contoured, curved shape that naturally fills the hand and makes it easier to maintain a stable frame. The textured, non-slip surface reduces the risk of the device slipping, which is especially important when recording for long periods of time. Thanks to the clever design, you can also comfortably record in both portrait and landscape orientations, making it easy to switch between different vlog formats.

Seesaw shutter button

A seesaw-type shutter button has been placed on the top for convenient operation. This design allows you to capture photos and recordings with minimal effort, with a clear, responsive touch response. This makes it easier to take handheld shots - without jerks or unnecessary shake caused by pressing the trigger too hard.

Quick access to the battery and memory card slot

The housing allows convenient opening, providing full access to the battery compartment. So you can quickly replace it at any time! In addition, at the top of the grip you will find a spring-loaded slot for a spare TF card, which allows you to have extra storage media always at hand. Such a solution makes it easier to work with longer recordings.

Expandable accessory kit

The housing offers additional mounting ports that make it easy to expand your film set. A 1/4" threaded hole allows mounting on tripods, monopods or mounts, and a Cold Shoe mount allows installation of a flash, microphone or other compatible accessories. As a result, one housing can become the centerpiece of a variety of equipment configurations - from a simple setup with a mount to more elaborate solutions.

Refined design details

A special hole allows you to attach a wrist strap to the case, which allows you to carry your kit safely, reducing the risk of accidentally dropping it. What's more, the bottom cutout provides convenient access to quick-mount mechanisms, which speeds up the installation of compatible bases or adapters.

Included

- Case
- Holder
- Wrist strap
- Button with crossbar
- T-type wrench

Manufacturer	Telesin
Model	S6-FMS-36-TDJ
Material	Aluminum alloy, silicone
Dimensions	115.5 × 67.41 × 54.76 mm
Weight	219 g
Compatibility	DJI Osmo Action 6

Color: black, GPSR Link: https://psr-assets.innpro.pl/photo_and_accessories/sg_photo_and_accessories_storage_and_transport.pdf, Box length: 19,50, Box width: 13,00, Box height: 4,50, Net weight: 279, Gross weight: 280
