Aprašymas

GODOX RS100Bi LED Photography Light

The GODOX RS100Bi is a compact 100 W COB LED light that delivers a light intensity of up to 28,600 lx at a distance of 1 m when used with the included lens reflector. The adjustable color temperature range of 2,800–6,500 K allows you to adjust the lighting from warm to cool, while the high CRI of 98 and TLCI of 98 help ensure natural color reproduction. The built-in rechargeable battery provides up to 52 minutes of runtime, making the RS100Bi ideal for both studio and on-location work.

Powerful and precisely controlled light

With 100 W of power and a light intensity of up to 28,600 lx at 1 m, the RS100Bi can be used as the main light source when filming videos, conducting interviews, or producing more complex content, and the included lens reflector helps you make the most of the lamp's capabilities. The color temperature range of 2,800–6,500 K gives you the freedom to adjust the light from warm to cool without the need for additional filters and makes it easier to match the lamp to ambient light and other sources on set. CRI 98 and TLCI 98 ensure accurate color reproduction, which is particularly important when filming faces, showcasing products, taking photos, live streaming, and other projects where light quality affects the final look of the footage.

Up to 52 Minutes of Cordless Operation

The built-in rechargeable battery allows the RS100Bi to operate for up to 52 minutes at full power, providing greater freedom when working in locations with limited access to power outlets. The light supports USB-C charging and can operate while charging, allowing it to remain active even during longer sessions. This design makes it suitable for both mobile use and more stationary setups.

Controls Tailored to Various Applications

The lamp's settings can be adjusted directly on the unit or via the Godox Light app. The RS100Bi also supports wired DMX/RDM control, allowing it to be used as part of a more extensive lighting system. The NFC feature speeds up adding the light to the app—simply hold a compatible smartphone near the device to quickly begin setting up the connection.

11 FX effects and quiet operation

The RS100Bi offers 11 built-in FX effects that let you add variety to your recordings without having to manually adjust the intensity or character of the light. This feature is ideal for creating films, short videos, and creative scenes that require more dynamic lighting. The light also offers several fan modes, including a silent mode, which helps minimize noise during podcast recordings, live streams, and other content where audio is being recorded simultaneously.

Expand Your Setup with Additional Accessories

The GODOX RS100Bi uses the compact Godox S-Mount system, enabling the use of compatible accessories. This allows you to tailor the lighting to a specific project and use a single light in various configurations. As a result, the RS100Bi can be easily adapted for both photography and video recording.

Included in the set

- GODOX RS100Bi light
- AD-E2 Mount
- USB-C Charging Cable
- Lens Reflector
- Carrying Case

Manufacturer	GODOX
Model	RS100Bi
