Aprašymas

Godox LR150 Air LED Ring Light

The GODOX LR150 Air is a portable LED ring light with an inflatable head that provides soft and even light for photography, video recording, and live streaming. It offers color temperature adjustment ranging from 2800 to 6500 K, 11 FX effects, and a light intensity of 1760 lx at 5600 K and a distance of 0.5 m. CRI ≈ 97 and TLCI ≈ 98 help maintain natural color reproduction, and the built-in battery in the handle provides approximately 92 minutes of runtime at 100% brightness.

Soft Light for Portraits and Live Streams

The inflatable ring head provides clean, even lighting that flatters the face. The LR150 Air is ideal for portrait and beauty photography, as well as live broadcasts, where soft light helps minimize harsh shadows. The ring design also works well in small spaces where quick and convenient light setup is essential.

Color Temperature Adjustment and 11 FX Effects

The color temperature range of 2800–6500 K allows for seamless adjustment from warmer to cooler light, making it easier to adapt to the conditions and nature of the shoot. The LR150 Air also offers 11 special effects that expand your ability to create more dynamic scenes. This combination provides greater flexibility for both classic and more creative projects.

Approximately 92 minutes of runtime

The battery is housed in the handle, allowing you to use the light without tangled cables. The built-in 4750 mAh lithium battery provides approximately 1 hour and 32 minutes of runtime. Charging takes approximately 2 hours and 20 minutes with a 12 V □ 2 A power source, and the controller also allows for direct external power via the USB-C port.

Convenient Placement in Various Locations

The LR150 Air can be held in the hand, mounted magnetically, or screwed into place, making it easy to quickly adjust the lamp's position to suit working conditions. When inflated, along with the controller and battery mount, the model measures approximately 470 × 90 × 635 mm and weighs about 603 g. This makes it a portable solution that can be used both in stationary setups and on the go.

Control via the Controller and App

The flash's settings can be adjusted directly using the controller located on the front of the unit or via the Godox Light app over Bluetooth. This allows you to quickly adjust settings without having to walk over to the flash each time. The LR150 Air is part of the GODOX modular system, in which the battery grip can be used with compatible ring or wand-style heads, increasing the flexibility of the entire setup.

Included in the set

- GODOX LR150 Air flash
- Controller
- Mounting bracket
- BG-LC5A battery grip
- Charging cable
- Silicone ring
- Inflator
- Storage bag

Manufacturer	GODOX
