Aprašymas

GODOX Litemons LA300R LED Light

The Godox Litemons LA300R is a 330 W COB LED light that provides great flexibility for photography, video recording, and live streaming. It offers a wide color temperature range from 1,800 to 10,000 K, full RGB color modes, and a CRI of 95+, allowing you to both precisely adjust white light and create more creative, colorful lighting setups. Support for the Godox Light app, NFC, and a Bowens mount further simplify the use of the light in various studio and mobile setups.

Full control over color and color temperature

The LA300R supports CCT, HSI, RGBW, GEL, and FX modes, allowing you to precisely tailor the lighting to a specific scene. The CCT range of 1,800–10,000 K allows you to transition from very warm light to distinctly cooler tones, while the RGB modes let you freely create colorful lighting without the need for additional filters. GEL mode expands your creative options with digital color filters, making it easy to quickly achieve a specific effect on set.

App Control and Quick NFC Pairing

The light works with the Godox Light app, allowing you to conveniently adjust its settings from your smartphone without having to walk over to the tripod every time. The NFC feature streamlines adding the device to the app—simply hold a compatible phone near the marked area on the light to begin setting up the connection. This feature is especially useful when working with multiple light sources or when the LA300R is out of the

operator's immediate reach.

FX Effects for More Dynamic Shots

Built-in FX effects let you quickly achieve changing lighting scenarios without manually programming successive changes in color and brightness. Thanks to this, the LA300R can be used not only for classic portrait, product, or broadcast lighting, but also for more creative film productions. Pre-set effects make it easier to build the atmosphere of a scene and reduce the need for additional light sources.

Bowens Mount and Extensive Expansion Options

The standard Bowens mount allows you to use compatible light-shaping accessories, such as softboxes, reflectors, and other components that utilize this system. This makes it easy to adjust the lighting characteristics as needed—from soft, diffused light to a more focused beam. The kit also includes a reflector that helps direct the light emitted by the lamp.

Power for Studio and On-Location Use

The LA300R can operate on AC power, making it suitable for long studio sessions without interruptions to change batteries. It can also be powered via a V-Mount, which increases the light's portability and allows you to use it in locations without access to a power outlet. The combination of 330 W of power, full-color light, and flexible power options makes this model suitable for both permanent studio setups and on-location shoots.

Included in the set

- GODOX Litemons LA300R light
- Power supply
- AC power cord
- Safety lanyard
- BR30 reflector

Manufacturer	GODOX
Model	LA300R
Input power	330 W
Power supply	100-240 V, 50/60 Hz
Color temperature range	1,800-10,000 K
Green and magenta adjustment	-100% to +100%
Brightness adjustment range	0-100%
CRI	≥95
TLCI	≥94
Bluetooth control range	Up to 30 m
Operating temperature	-20°C to 40°C
Wireless control	Bluetooth, Godox Light app, NFC
Dimensions of the light without reflector	Approximately 23 × 16 × 24 cm
Light weight without reflector	Approximately 2.5 kg
