Aprašymas

GODOX Litemons LP600R RGB LED Light Panel

The GODOX Litemons LP600R RGB is a versatile LED light panel that lets you freely create lighting setups for photography, video recording, and video production. It provides soft, bright light, a wide range of color temperature adjustments, and extensive color-adjustment capabilities, making it easy to tailor the lighting to any scene. Professional color modes and special effects open up additional creative possibilities, and control via the Godox Light app makes it easy to make adjustments without having to walk up to the light. Its lightweight design, battery-powered operation, and included carrying case make this panel ideal for both studio and on-location use.

From warm tones to cool daylight

A wide color temperature range from 1,800 K to 10,000 K allows you to precisely adjust the lighting to the surrounding conditions and your intended visual effect. Warm, amber tones are ideal for creating atmospheric portraits and moody scenes, while cooler light is useful for product shoots, interviews, or studio recordings. The smooth adjustment also makes it easy to match the color temperature to other light sources on set. The panel provides soft yet bright lighting, allowing you to capture aesthetically pleasing shots and maintain control over the appearance of the scene you're photographing or filming.

Complete Freedom to Create Colorful Scenes

The GODOX LP600R RGB offers several advanced operating modes, allowing you to experiment with colors and create a unique atmosphere in your shots. In HSI mode, you have access to as many as 36,000 colors and a full 360-degree color space, allowing you to precisely select shades that match the character of your project. RGBW mode allows you to mix the four light components (red, green, blue, and white), providing additional flexibility when creating color compositions. You also have access to GEL mode, which offers a selection of popular color filters. This allows you to quickly achieve a specific lighting style without having to use traditional, physical filters.

14 lighting effects for creative projects

The built-in FX effects let you add variety to your recordings with dynamic lighting without the need for additional equipment. The panel offers 14 preset simulations: Flash, Lightning, Cloudy, Broken Bulb, TV, Candle, fire (Fire), fireworks (Firework), explosion (Explosion), welding (Welding), police car (Police Car), SOS signal, RGB color cycle (RGB Cycle), and party (Party). Such a wide selection allows you to create both subtle lighting changes and striking effects used in movie scenes, music videos, or creative advertising materials. Simply select the appropriate mode to quickly enhance a shot with an additional visual element and give it the desired character.

Convenient Control and Precise Lighting Adjustment

The control panel is designed with on-set convenience in mind. You can adjust lighting parameters directly on the unit or remotely via the Godox Light app, which uses Bluetooth connectivity. The latter option is particularly useful when the light is out of arm’s reach or positioned in a hard-to-reach spot. Removable barn doors provide additional control over the direction of the light, allowing you to shape the scene’s lighting as needed. The panel is also equipped with a bottom mount that allows for smooth 360° angle adjustment, making it easy to direct the light toward a selected subject, model, or part of the set.

Ready for use in the studio and beyond

The GODOX Litemons LP600R RGB is designed to operate in a variety of conditions, offering greater flexibility regardless of the location of your photo or video shoots. The panel supports two power options: a DC power source or an NP-F battery, which must be purchased separately. The ability to use battery power is particularly useful during outdoor sessions, when filming in locations without easy access to an outlet, or when frequently changing lighting setups. The lightweight design makes it easy to transport and set up the lighting rig, and the included carrying case allows you to conveniently store the panel and take it along to future projects. It’s a practical choice for photographers, videographers, and content creators who want a wide range of lighting options always at their fingertips.

Manufacturer	GODOX
Model	LP600R
Weight	985 g
Connectivity Technologies	Wired
Hardware Interface	Bluetooth
Flash Modes	Constant light, adjustable brightness, adjustable color temperature
Screen Size	26.4 cm
Supported Devices	Smartphones, tablets
