Aprašymas

GODOX ML80Bi LED Light

The GODOX ML80Bi is a compact LED light that, with its included zoom lens, achieves a light intensity of up to 29,600 lx at a distance of 1 m at a color temperature of 5600 K. The color temperature adjustment range of 2800–6,500 K allows for a smooth transition from warm artificial light to cooler daylight, while the high CRI of 96 and TLCI of 96 help maintain natural and consistent color reproduction. The lightweight, modular design works well in a small studio as well as during on-location photography or video shoots.

Precisely adjust the light's character

Smooth color temperature adjustment from 2,800 to 6,500 K makes it easy to adapt the ML80Bi to the character of the scene you're shooting. You can achieve both warmer lighting and a color temperature similar to daylight without having to change the light source itself. CRI 96 and TLCI 96 promote accurate color reproduction, which is essential for professional photography and video production.

Up to 29,600 lx with the zoom lens

The included zoom lens allows for a light intensity of up to 29,600 lx at a distance of 1 m at the 5600 K setting, enabling the compact ML80Bi to deliver high light intensity. It achieves brightness comparable to a 100 W lamp while maintaining a compact form factor. The zoom lens increases flexibility when positioning the light, and the Godox mounting system allows you to use compatible accessories to further shape the light.

Power Options Suited for Studio and Outdoor Use

The ML80Bi can operate using a AC power adapter or the included 6600 mAh battery. The battery provides up to 60 minutes of operation at full power, allowing you to use the light cordlessly during on-location shoots. It is also possible to use NP-F or V-Mount batteries by using the Godox ML-NPA plate or V-Mount plate, respectively, which expands power configuration options during longer sessions.

Convenient Control and Quick Lighting Adjustments

The flash's settings can be adjusted directly on the unit or via the Godox Light app. Bluetooth and NFC connectivity facilitate wireless operation, allowing you to change settings without having to approach the light. The ML80Bi is also compatible with magnetic diffusion filters, which let you quickly adapt the light to a specific shot.

Included

- GODOX ML80Bi light
- 6,600 mAh battery
- Zoom lens
- Mounting adapter
- USB-C cable
- Carrying bag

Manufacturer	GODOX
Model	ML80Bi
Light Intensity	Up to 29,600 lx at 1 m and 5600 K with zoom lens
Color Temperature Range	2800-6500 K
CRI	96
TLCI	96
Battery capacity	6,600 mAh
Run time	Up to 60 min at full power
Connectivity	Bluetooth, NFC
Interface	USB-C
