Aprašymas

Godox Litemons LE300Bi LED Light

The Godox Litemons LE300Bi is a 320 W bi-color LED light that provides intense and precisely adjustable light for photography, video recording, live streaming, and professional film productions. With the included reflector, it achieves an illuminance of up to 58,900 lx at a distance of 1 m, and color temperature adjustment in the range of 2,800–6,500 K allows for a smooth transition from warm to cool light. High CRI 98+ and TLCI 98+ ratings help preserve natural skin tones and ensure accurate color reproduction.

High Power and Flexible Color Adjustment

With 320 W of power and an illuminance of up to 58,900 lx at 1 m, the LE300Bi serves as an efficient light source for a wide range of projects. The color temperature range of 2,800–6,500 K makes it easy to adapt the lighting to existing conditions or the intended mood of the scene—from soft, warm tones to bright, cool light. The lamp is ideal for live broadcasts and podcasts, as well as more demanding film productions.

Accurate Colors and 11 FX Effects

CRI and TLCI ratings of 98+ ensure accurate color reproduction, which is particularly important when photographing products and filming faces. The LE300Bi also offers 11 built-in FX effects that let you quickly achieve more dynamic scene lighting without having to manually adjust the light's settings.

Controls Tailored for Professional Work

The LE300Bi offers several control methods, making it easy to adapt the operation to the size and nature of the shoot. The light's settings can be adjusted wirelessly via Bluetooth using the Godox Light app, as well as through a wired DMX system. It can also be integrated into a CRMX network using the TimoLink RX, allowing you to incorporate the light into a more extensive lighting system.

Bowens Mount for Greater Flexibility

The standard Bowens mount allows you to use both flat and classic accessories that utilize this system. This allows you to tailor the light's character to a specific shot using compatible light-shaping accessories. As a result, the LE300Bi can be used in a variety of configurations, from simple studio setups to more complex photography and film productions.

Metal Construction and Quiet Operation

The sturdy metal housing is combined with an efficient heat dissipation system, which helps maintain stable operation even during longer sessions. The built-in fan operates very quietly, making the light suitable for projects where audio is being recorded simultaneously. The unit measures approximately 26 × 23 × 15.8 cm and weighs approximately 2.8 kg.

Included in the set

- GODOX Litemons LE300Bi light
- BR30A reflector
- AC power cord

Manufacturer	GODOX
Model	LE300Bi
