Aprašymas

GODOX Litemons LP600Bi Bi-Color LED Light Panel

The GODOX Litemons LP600Bi light panel allows you to create professional lighting both in the studio and during outdoor shoots. With 60 W of power, adjustable color temperature, and high color accuracy, it's perfect for photography, videography, or live streaming. The built-in diffuser provides soft, even light, and the ability to smoothly adjust brightness makes it easy to achieve the desired effect. Control via the Godox Light app, a swivel mount, and two power options allow you to freely adapt the device to your working conditions. The entire unit features a lightweight, durable design, and the included carrying case makes it easy to safely transport the panel between locations.

Tailor the light to every shot

A wide color temperature range from 2800 K to 6500 K lets you freely shape the atmosphere of your photos and videos—from warm, cozy lighting to cooler, more neutral light. The Litemons LP series panel offers 60 W of power and high brightness, providing the right conditions for working on a variety of projects. The built-in dimmer allows for smooth adjustment of light intensity from 0 to 100%, so you can precisely tailor the lighting to the scene without having to change the lamp's settings. Such a wide range of adjustment options makes the LP600Bi ideal for use as both a main light source and supplemental lighting.

Natural Colors and Eye-Pleasing Lighting

In photography and video production, it's not just about the right brightness—it's also about accurate color reproduction. The GODOX LP600Bi achieves CRI and TLCI ratings of 96, allowing for natural skin tones and preserving the authentic colors of the subjects being photographed. The integrated diffusion panel scatters the light, providing soft, even illumination without overly harsh tonal transitions. At the same time, it protects the LEDs and reduces eye strain during extended work in front of the camera. This makes the device ideal for recording video, conducting live streams, conducting interviews, or creating content for social media.

Convenient Control via the App

Adjusting lighting settings doesn't mean you have to walk over to the light every time. Thanks to the Godox Light app, you can manage the LP600Bi's settings from your mobile device, which significantly streamlines workflow on set. The app allows you to conveniently adjust lighting, switch between scenes, and synchronize multiple lights. This is especially useful during more complex projects that involve several light sources. The ability to remotely manage settings allows you to make changes more quickly and maintain greater control over the look of the entire scene.

Flexibility for Studio and On-Location Work

The GODOX Litemons LP600Bi features two power options, allowing it to easily adapt to various working conditions. In the studio, you can use AC power, while during on-location shoots or recordings in places without access to an outlet, the unit can run on two Sony L-Series/NP-F batteries, which must be purchased separately. This solution allows you to maintain mobility without sacrificing professional lighting. An additional convenience is the mount that allows the panel to rotate 360°, making it easy to direct the light at the right angle and precisely position it relative to the subject being photographed or filmed.

A lightweight design you can take with you on the go

With compact dimensions of approximately 20.3 × 25.4 cm and a weight of just 985 g, the LP600Bi is ideal for mobile work. Its slim design makes it easy to set up lighting even in tight spaces, and its light weight simplifies transport and setup of the shooting location. The housing is made of high-quality materials, designed for durability and resistance to heavy use in various conditions. The kit also includes a specially designed, durable, shock-resistant carrying case that helps protect the equipment during storage and transport. Thanks to this, the panel can accompany creators both during daily studio shoots and on location projects.

Included

- GODOX Litemons LP600Bi bi-color LED light panel
- shock-resistant carrying case
- swivel mount
- user manual

Manufacturer	GODOX
Model	LP600Bi bi-color
Weight	985 g
Connectivity Technologies	Bluetooth
Hardware Interface	Bluetooth
Flash Modes	11 effect modes: flash, lightning, cloudy, broken bulb, TV, candle, fire, fireworks, explosion, welding, SOS
Screen size	8 inches
Color	White
Supported devices	Smartphones, tablets
