Aprašymas

Yeelight Obsid RGBIC YLFWD-0025 LED Strip

The Yeelight Obsid RGBIC YLFWD-0025 lets you dramatically transform any space with up to 16 million colors, adjustable white tones, and addressable lighting effects. The strip is 2 m long, and each light point can be controlled individually, giving you great freedom when creating lighting arrangements. The product also offers preset effects, synchronization with music, screen colors, and games, and is compatible with the Matter standard and popular smart home systems.

Customize Each Light Point Your Way

RGBIC technology enables the simultaneous display of multiple colors and the creation of smooth, addressable lighting effects. Each light point can be individually customized, allowing you to create your own color schemes to match your current mood or decor. There are also preset lighting effects available, allowing you to quickly change the character of a space without manually setting each color.

From adjustable white to vibrant colors

The strip not only lets you access a palette of 16 million colors but also allows you to adjust the shade of white light. This means you can tailor the lighting to suit both peaceful, everyday relaxation and a more dynamic atmosphere during meetings or entertainment. Changing the settings allows for a quick transition between cozy lighting and intense, multicolored effects.

Lighting synchronized with entertainment

The Yeelight Obsid can synchronize lighting effects with music, colors displayed on the screen, and games. This allows you to create a more immersive environment while listening to your favorite songs, watching content on the screen, or playing games. Lighting is no longer just a backdrop; it can dynamically interact with the content being played.

Discreet black base

The black base of the strip makes it easier to blend in visually with dark furniture and electronics. This finish works well, for example, on dark desks or in elaborate computer setups, where the strip itself can remain less visible. As a result, the light it emits and the selected color effect take center stage.

Adjust the length to fit your installation

The 2-meter-long strip comes with a control module. You can cut it at the light points, and the system also allows for extension up to approximately 5 meters. A single set can support up to 3 Extension modules (sold separately).

Control via app, voice, and Matter

The strip is compatible with Matter, Google Home, Apple Home, Samsung SmartThings, Amazon Alexa, and the Yeelight platform, making it easy to integrate into your existing smart home system. Control via the app and voice commands is available, allowing you to conveniently adjust settings without direct access to the strip. Connectivity is provided by 2.4 GHz IEEE 802.11 b/g/n Wi-Fi and Bluetooth 5.0 (Bluetooth Low Energy), and the device is compatible with Android 7.0 and later, as well as iOS 16.2 and later.

Manufacturer	Yeelight
Model	YLFWD-0025
Ambient Temperature TA	25°C
Power Factor	0.7
Wireless Connectivity	Wi-Fi IEEE 802.11 b/g/n 2.4 GHz; Bluetooth 5.0 Bluetooth Low Energy
