Aprašymas

140 watts of single-port charging power can charge a 16-inch MacBook Pro from 0-86% in just 60 minutes. Cutting-edge Airpyra technology, combined with support for GaNInfinity™ chips, delivers 160 watts of power and multiple charging ports in a palm-sized package.

21% smaller than Apple's 140W charger. Millisecond temperature sensing protects against overheating, overloading and overcurrent.

The integrated Ugreen Thermal Guard™ system monitors temperature changes in real time and intelligently distributes power to devices to ensure a full, fast charge without compromising battery longevity.

Charges up to 4 devices, from IoT devices to MacBook Pros.

The Nexode Pro family of chargers is compatible with modern smartphones, tablets and laptops and supports PD/QC/SCP/AFC/PPS and 45W Samsung Super Fast Charging 2.0 fast charging protocols.
