Aprašymas

The Lindy USB 2.0 Cat.6 Extender extends the distance between four USB peripheral devices and the computer up to distances of 60m using a single Cat.5e/6 or higher network cable.

The Extender is a two part hardware solution comprising a transmitter that connects directly to your computer and a receiver that connects to the USB device.

It is perfect for use with USB 2.0 devices such as storage devices, printers, scanners, mice and keyboards. The included power supply ensures secure and uninterrupted electricity supplies. For best performance and compatibility, we recommend the use of solid core patched cables.
