Pagrindinės savybės

- ✓ Synchronize, buffer, and queue streams for time-sensitive communication requirements with Audio Video Bridging (AVB).
- ✓ Get Error Correcting Memory (ECC) protection and improved data reliability from four transmit and four receive queues that manage packets and reduce latency to optimize multi-core processing performance.
- ✓ Help reduce Ethernet connection power consumption with a card that meets the IEEE802.3az Energy Efficient Ethernet standard to switch to a low power idle state when not in use.
- ✓ DMA Coalescing batches multiple packets together so that the processor, memory, and OS wake from idle states for group tasking vs. one-off commands.
- ✓ Help reduce your impact on the environment with a low halogen^[1] design.
