## Pagrindinės savybės

- ✓ Tinklo kartotuvus 185 m
- ✓ „Wi-Fi“ Dviguba juosta (2,4 GHz / 5 GHz) 1200 Mbit/ai Wi-Fi 4 (802.11n), Wi-Fi 5 (802.11ac), Wi-Fi 6E (802.11ax)
- ✓ Montavimo tipas: Siena
- ✓ Balta

## Aprašymas

### The fastest Wi-Fi yet

Next-gen Wi-Fi 6 with combined speeds of up to 1.8 Gbps. Experience lightning-fast downloads, lower latency and reduced congestion

### Instant Wi-Fi Extender

Plug in the extender, set it up via the app or One-Touch WPS - and you'll immediately extend your Wi-Fi with extended coverage of up to 185 sqm.

### Smart Connect Technology

Automatically assigns each device to the best wireless band, so that your whole network can operate with optimal performance.

### Smart Signal Indicator

Automatically assigns each device to the best wireless band, so that your whole network can operate with optimal performance.

### Gigabit Port

Connect additional wired device to your network with the built-in Gigabit Ethernet port.

### Seamless whole-home connectivity with D-Link Wi-Fi Mesh

Create a mesh network that covers your home in seamless Wi-Fi when used together with compatible D-Link Wi-Fi Mesh routers and extenders<sup>1</sup>.

#### Trusted Wireless Security

Supports the latest WPA3™ Wi-Fi security with 128-bit encryption for optimum protection

### Easy Management

Easily view, manage and configure the DAP-X1860 with the free D-Link Wi-Fi app.

#### Wi-Fi 6. The revolutionary leap for hyperconnected homes.

Extend your Wi-Fi to the furthest corners of your home and garden, so that you can truly experience next-generation Wi-Fi to the fullest. Watch, game and browse faster than ever before - with coverage throughout your entire home.

#### Rapid and reliable seamless Wi-Fi where you need it the most.

The DAP-X1860 is a portable wall-plug wireless extender that boosts your Wi-Fi network, including those using the latest Wi-Fi 6 technology. Simple to set up with a touch of a button and the visual Wi-Fi signal indicator will help you find the optimal spot in your home to experience high-speed Wi-Fi 6 on all your connected devices.

### Upgrade your Internet to reach further

The DAP-X1860 enables you to extend your existing Wi-Fi to get an enormous coverage of up to 185 sqm, delivering next-gen Wi-Fi 6 speeds of up to 1.8 Gbps throughout every corner of your home.

OFDMA and MU-MIMO technology ensures your Internet bandwidth is utilised efficiently - so your devices can stay connected at the highest speeds possible, without putting a strain on your network.

### Build a better network with D-Link Wi-Fi Mesh

Pair the DAP-X1860 with a compatible D-Link Wi-Fi Mesh router<sup>1</sup> to create a whole-home mesh network that allows you to enjoy staying connected seamlessly throughout your entire home. What's more, with support for Wi-Fi EasyMesh™ and the 802.11k/v standard for mesh smart roaming, you can use it with an even wider choice of compatible routers and extenders.

## LED Wi-Fi Signal Strength Indicator

The visual Wi-Fi signal indicator allows you to see where the strongest and weakest Wi-Fi signal spots are around your home, helping you to identify the best possible location to place the extender for optimal network performance.

## Easy connectivity

The DAP-X1860 is built to get you going immediately. Simply push the WPS on both the router and the Wi-Fi Extender and you're good to go.

In addition, the Wi-Fi extender also offers a Gigabit Ethernet port, so you can connect a wired device that needs Internet connectivity, such as a game console or a Smart TV.

## Stay protected from online threats with the latest in Wi-Fi Encryption

The DAP-X1860 supports WPA3 - the latest version of the Wi-Fi Protected Access (WPA) protocol that encrypts user data and protects wireless networks from outside threats. WPA3 includes a new protocol to verify authentication and secure your devices' connections while further protecting your wireless network from attacks.

## Easy setup, easy-to-use app

With the D-Link Wi-Fi app, you can set up and manage your DAP-X1860 straight from your smartphone or tablet.

## Techninė specifikacija

| Veikimo charakteristikos                       |                                                            |
|------------------------------------------------|------------------------------------------------------------|
| Tipas                                          | Tinklo kartotuvas                                          |
| Maksimalus perdavimo atstumas                  | 185 m                                                      |
| Eterneto LAN duomenų perdavimo norma           | 100,1000 Mbit/ai                                           |
| WPS paspaudžiamasis mygtukas                   | Taip                                                       |
| Antena                                         |                                                            |
| Antenų kiekis                                  | 2                                                          |
| Antenos tipas                                  | Vidinis                                                    |
| Tinklas                                        |                                                            |
| „Wi-Fi“                                        | Taip                                                       |
| Wi-Fi standartai                               | Wi-Fi 4 (802.11n), Wi-Fi 5 (802.11ac), Wi-Fi 6E (802.11ax) |
| Belaidis LAN duomenų perdavimo greitis (maks.) | 1200 Mbit/ai                                               |
| „Wi-Fi“ dažnių juosta                          | Dviguba juosta (2,4 GHz / 5 GHz)                           |

| Moduliacija                                    | OFDM, QAM                                                  |
| Ryšys                                          |                                                            |

Ethernet LAN (RJ-45) portų kiekis 1

#### Konstrukcija

|                    |             |
|--------------------|-------------|
| Produkto spalva    | Balta       |
| Montavimo tipas    | Siena       |
| LED indikatoriai   | Taip        |
| Atstatymo mygtukas | Taip        |
| Sertifikavimas     | FCC, IC, CE |

#### Energijos valdymas

|                                    |             |
|------------------------------------|-------------|
| AC įėjimo įtampa                   | 100 - 240 V |
| AC įėjimo dažnis                   | 50 - 60 Hz  |
| Galios suvartojimas (maks.)        | 9,7 W       |
| Pridedamos maitinimo šakutės tipai | EU          |

#### Aplinkos sąlygos

|                                       |             |
|---------------------------------------|-------------|
| Darbo temperatūros diapazonas (TT)    | 0 - 40 °C   |
| Sandėliavimo temperatūros norma (T-T) | -20 - 70 °C |
| Darbinė temperatūra (siūstuvai)       | 10 - 90 °C  |
| Saugojimo temperatūra (siūstuvai)     | 5 - 95 °C   |

#### Svoris ir matmenys

|         |        |
|---------|--------|
| Plotis  | 60 mm  |
| Ilgis   | 75 mm  |
| Aukštis | 165 mm |
| Svoris  | 293 g  |

#### Logistikos duomenys

|                                |          |
|--------------------------------|----------|
| Darniosios sistemos (DS) kodas | 85176990 |
|--------------------------------|----------|
