Pagrindinės savybės

- ✓ **COMPREHENSIVE SETTINGS:** The external hard drive enclosure supports RAID mode 0 and 1 as well as the setting to display each hard drive individually or bundled in the system (Single/Large)
- ✓ **SPEED:** The external hard drive enclosure has USB 3.1 (Gen 2) which allows transfer speeds of up to 10 Gbps. UASP is also supported
- ✓ **LED INDICATOR:** In order to always be up to date, the enclosure has an LED on the front that always shows the current status of the hard drive. This way, one knows about the use, access and possible errors
- ✓ **COOLING:** The hard drives always remain cool in the enclosure, because the heat generated is excellently transported out of the enclosure by a 60 mm fan, thus ensuring super performance
- ✓ **FAILURE SAFETY:** If the enclosure is in RAID 1 mode, a defective hard drive can be replaced without any problems, as the data is then simply transferred to the new hard drive
