Pagrindinės savybės

- ✓ View wind speed and direction in real time directly on your smartphone
- ✓ Access your data history to track wind over time
- ✓ Receive a smartphone alert when the wind picks up
- ✓ Your life is made easier taking into account changes in the wind
- ✓ Fix it outdoors, up to 100 meters from your Weather Station's indoor module
- ✓ Fully weatherproof
- ✓ Only one Anemometer can be connected to the Netatmo Smart Home Weather Station sold separately
- ✓ Wireless connection between the Anemometer and the Smart Home Weather Station
- ✓ Can be adjusted on a 1/4" standard mounting screw

Aprašymas

See how the wind blows via your Smart Home Weather Station

The perfect addition to your Weather Station, the Netatmo Smart Anemometer sends wind data directly to your smartphone. Using the latest ultrasound technology, it reliably measures wind speed and direction in real time - even during storms! The Anemometer can also provide you with more precise readings of the "feels like" temperature outside your home.

Use your data history to understand wind over time

Access data gathered by your Smart Anemometer via the app. View your data history to track the wind and learn about wind activity around your home while you are away. You will always know exactly which way the wind is blowing!

Receive a smartphone notification when the wind picks up

Do you live in a region prone to storms? Would you like to keep an eye on your garden? Or maybe you 'are just curious about changes in the wind? Customize your alerts to receive real-time information when the wind gets stronger or reaches a certain speed. The choice is yours!

Your life made easier, by taking into account changes in the wind

Your Anemometer keeps you up to date with changes in the wind. Put that information to good use! When the wind picks up, you should stow away your garden furniture, get set to fly a kite with your kids, or hang your washing out to dry. Enjoy outdoor sports? The Netatmo Smart Anemometer is a real team player.

Fit the Smart Anemometer with ease

The Netatmo Smart Anemometer is fixed outdoors, up to 100 meters from your Weather Station's indoor module. Its high-quality, UV-resistant plastic coating withstands sunshine, hail and strong winds.

Techninė specifikacija
