Aprašymas

HIGH-PERFORMANCE UHF RFID FOR ZEBRA'S TC20 MOBILE COMPUTER

If you have invested in Zebra's TC20 mobile computer, now you can simply slip the TC20 into the RFD2000 sled to add powerful UHF RFID capabilities. Purpose-built for the TC20, the RFD2000 delivers the same robust RFID performance you expect in a dedicated device — you no longer need to compromise performance for the flexibility to add and remove RFID as needed. The result is a winning combination — a complete retail solution that makes inventory management, superior shopper interactions and assisted selling a breeze.

SUPERIOR ERGONOMICS

The RFD2000 was built with store associates and shoppers in mind. Superior ergonomics and a compact, lightweight design bring comfort, even to inventory management tasks. And, the modern design fits right into shopper-facing areas, even in the most design-conscious stores.

THREE FLEXIBLE MODES

Geiger-counter mode makes it easy to locate items for a shopper in minutes. Triggerless mode enables the continual capture of RFID tags, without the trigger, for fast, easy and comfortable inventory and cycle counts. And, the ability to write barcode data to RFID tags simplifies omni-channel inventory visibility and provides seamless flexibility for many in-store applications.

EASY ON, EASY OFF

The RFD2000 sled is easy to slip on and off the TC20 whenever there is a task requiring RFID. And, while the RFD2000 holds the TC20 securely in place, in seconds you can slip the RFD2000 off and return the TC20 to its natural compact and pocketable size.

RFD2000 UHF RFID Sled

SUPERIOR BATTERY POWER, MANAGEMENT

With the RFD2000 sled, your workers can count on full-shift power, even with the most intensive use. You get the longest battery life in this class, plus our unique power-optimizing battery technology and premium high-grade capacity cells. And with Zebra's PowerPrecision removable battery, you get the advanced battery statistics you need to monitor battery health — and easily spot and remove aging batteries that can no longer hold a full charge.

Techninė specifikacija

Specifications	
Sandėlio grupė	Sonstiges > Barcode Scanner [+994][-201]
Technical details	
Frequency	865000 kHz
Product colour	Black
International Protection (IP) code	IP52
LED indicators	Yes
Working distance	60 cm
Built-in display	Yes
Power	
Battery type	Built-in battery
Battery technology	Lithium-Ion (Li-Ion)
Battery capacity	3160 mAh
Logistics data	
Harmonized System (HS) code	84719000
Weight & dimensions	
Width	79 mm
Depth	149 mm
Height	133 mm
Weight	310 g
Operational conditions	
Operating temperature (T-T)	10 - 50 °C
Operating relative humidity (H-H)	-40 - 70%
Storage temperature (T-T)	5 - 85 °C
Storage relative humidity (H-H)	5 - 85%
Packaging data	
Batteries included	Yes
AC adapter included	Yes
