Pagrindinės savybės

- ✓ Ultra high Firewall/VPN/UTM performance
- ✓ New powerful uOS accelerates system response time with user friendly design
- ✓ AI-powered cybersecurity - High assurance multi-layered protection against cyber threats
- ✓ User defined port flexibility with MultiGig and PoE+
- ✓ VPN utility now available in multiple OS platforms

Aprašymas

Secure. Fast. Protection

USG FLEX H series gives ultra-high firewall/UTM/VPN throughput with multi-gig PoE+ interfaces to get you ready for the upcoming multi-gig era. Empowered by Zyxel AI cloud, it unleashes multi-layered protection for you to enjoy enterprise-grade security at lightning speed.

Nebula Together

We bring USG FLEX to join the Nebula Cloud Management family. Simply deploying a firewall will not guarantee safety while untrusted devices, users, and applications are accessed widely. Nebula's revolutionary solution brings a Zero-Trust Network Security granular policy to organizations with access authentications and secured WiFi.

Best threat intelligence alliance

USG FLEX integrates threat intelligence from leading companies and organizations in the cybersecurity field for scaled information about file and real-time threat data. By leveraging a wider malware coverage with multiple-sourced database, this increases the accuracy in threat detection.

High assurance multi-layered protection

USG FLEX is designed with multi-layer protection against multiple types of threats from in and out. Multiple security services empower you to restrict users' inappropriate application usage or web access. Zyxel offers leading-industry DNS content filter, eliminating blind spots in all encrypted traffic with TLS 1.3 without the need to deploy SSL inspection. *UTM Security Pack license required

Collaborative Network Defense

The firewalls detect a threat on any of the connected clients and will sync with the Nebula control center, then automatically respond to cyber threats and contain the device(s) at the edge (Wireless Access Point) of your network. It is a perfect fit for IT to address the requirements of a decentralized network infrastructure and provide automatic protection.*UTM Security Pack license required

Same Security Across Networks

Zyxel's new Secure WiFi feature gives you the ability to create a "drop-in" Access Point that can be configured to replicate the SSID of your office and automatically create a secure tunnel, creating seamless accessibility to your corporate network. This simplifies the deployment by creating a plug-n-play option while maintaining a high level of control over the security of remote workplaces. *Secure WiFi license required

Analytics report and enhanced insights

USG FLEX series dashboard gives user-friendly traffic summary and threat statistic visuals. Utilize SecuReporter for further threat analysis with correlation feature design, making it easy to proactively trackback network status to prevent the next threat event. Centralized visibility of network activities for you to easily manage multiple clients. *UTM Security Pack license required

Techninė specifikacija

Specifications	
Sandėlio grupė	Server/Storage/Network > Access Points/Routers [+1151][-307]
Data transmission	
Firewall throughput	15 Gbit/s
Network	
Wi-Fi	No
Security	
Security algorithms	SSL/TLS
Firewall security	Y
Management features	
LED indicators	Yes
Management platform	uOS
Ports & interfaces	
Connectivity technology	Wired
USB 2.0 ports quantity	1
Ethernet LAN (RJ-45) ports	12
Ethernet LAN data rates	10,100,1000 Mbit/s
Installed SFP+ modules quantity	2

Other features

Firewall throughput

15000 Mbit/s
