Pagrindinės savybės

- ✓ Industrial level DID LCD panel
- ✓ Suitable for extensive 7x24 continuous works
- ✓ Physical resolution of 1920x1080
- ✓ 5ms fast response time, no image ghosting
- ✓ Adapt newest 3D digital filtering and 3D digital noise reduction technology
- ✓ Built in 1080p IP camera
- ✓ High fidelity digital processing, brilliant and vivid video
- ✓ 120dB true WDR to provide balanced images, ensuring highly detailed images are seen
- ✓ VESA size: 100x100

Aprašymas

Purpose and Applications For Public Viewing Monitor

Supermarkets: Imagine you're shopping in your local supermarket, and you suddenly spot yourself on a small monitor. That's a PVM! These monitors are commonly found in supermarkets to monitor self-service areas and sometimes even above shop aisles.

Security and Deterrence: Businesses use PVMs primarily to deter inappropriate behavior and theft. They achieve this by

recording live footage while simultaneously displaying it to customers. The presence of PVMs has led to a 50% reduction in customer theft and a 30% increase in profits for supermarkets.

Advertising and Information: PVMs also serve as a platform for showing advertisements, customer information, and marketing content, maximizing their utility.
