The Lindy 120W 10 Port USB Charging Station allows charging up to 8 USB devices via Type A and 2 via Type C like tablets or smartphones.

Each USB Type A port can provide up to 5V 2.4A, each USB Type C port can provide up to 5V 3A to satisfy the most power hungry devices. If all 10 ports are occupied and/or when total power draw is higher than 120W, load balancing will occur.

With its smart charging function and support of many different protocols like QC 3.0 (only type C ports) , Samsung AFC and Apple 5V 2.4A Charging Protocol and BC 1.2 (only Type A ports) this USB Charging Station can recognise the connected device to automatically adjust the charging current for a fast and safe charge while also providing overcurrent, overvoltage and short-circuit protection to avoid excessive current damaging the device.
