Aprašymas

Cruiser Dual 2C 4G

Dual vision, 4G connection.

Multiple 4G Carrier Supported | 3+3MP LensDual-channel Independent Human & Vehicle DetectionMulti Lenses Co-detection | Tap-to-Track

Dual lens - securing 2 zones at once

Cruiser Dual 2C Dual comes with a fixed lens at the upper in addition to the normal PT lens, allowing you to monitor two areas at a time.

Specialized in no Wi-Fi environment

Designed for no Wi-Fi area

Cruiser Dual 2C 4G supports 4G connection, allowing you to protect properly where Wi-Fi signals are poor or no Wi-Fi at all, and EU & UK come with a pre-installed SIM card version, so you can take out the box and use it right away!

Multiple 4G carrier supported

Cruiser Dual 2C 4G supports multiple 4G carriers¹ across regions. Users can easily install local SIM cards for instant network access.

Double lens sync, double the peace of mind

Multi lenses co-detection offers double protection

When a target enters the surveillance range of the fixed lens, the PT lens will immediately focus on and keep tracking it. Even if the target moves beyond the surveillance boundary of the fixed lens, the PT lens can compensate for the blind spots in the field of view, providing you with dual assurance.

Focus as you like with Tap-to-track feature

You can click on the fixed camera view, and the PT camera will immediately move to the target position, allowing you to quickly focus on the area you want to check.

Every angle, every detail

3+3MP brings clear surveillance images

Both lenses on the Cruiser Dual 2C 4G are 3MP sharp, giving you the picture clarity you need to easily see the details in your surveillance.

Light the night up with smartness

Cruiser Dual 2C 4G supports 3 night vision modes, which can be switched depending on whether or not someone is present or if you wish to switch on the light, or turn it off.

The adjustable dual-lens give you 360° protection

Cruiser Dual 2C 4G's PT lens supports 0°-355° horizontal rotation and 0°-90° vertical rotation, while the fixed lens supports 260° horizontal rotation to protect your home 360°.

Enjoy easier security with IMOU Life

AI-powered precision - by IMOU SENSE®

IMOU SENSE® is IMOU's self-developed AI algorithm, which uses separate arithmetic for each lens of the Cruiser Dual 2C 4G, increasing its overall detection accuracy by more than 50% and giving you the results back in 0.02 seconds.

Accurate human and vehicle detection

Cruiser Dual 2C 4G accurately identify humans, vehicles, and effectively reduce false alarms caused by mosquitoes and tree shaking. Receive real-time alerts only for critical targets.

Customizable detection zone

You can set the areas you want to be detected in the app to avoid false alarms and achieve more efficient security.

Customizable alarm sound

We have preset alarm sound in the app, or you can customize your own alarm sounds as you wish.

Protection scheduling

You can customize the camera's working and resting times in the app, allowing it to protect your home as your wish.

IMOU All-day Saving Recording Mode

In AOR mode, the camera records full-frame video only when an event is detected, and 1 second per frame at all other times. This meets the need for all-day video recording and significantly saves storage space, allowing more video to be stored on a smaller memory card, the memory usage in various modes is as follows:

- Continuous recording
- AOR mode 100 events per day
- AOR mode no event
