Aprašymas

MSI MPG Ai1600TS PCIE5 is a high-capacity internal power supply designed to support demanding gaming rigs and professional workstations. It delivers reliable 1600 watt power with ATX12V 3.1 and EPS12V compatibility to handle multiple high-power GPUs and CPUs while maintaining stable voltages for system components. The fully modular design with a wide range of detachable cables simplifies installation and cable routing, and the included cable organizer and embossed black cables help create a clean, professional build appearance.

Efficiency and thermal management are balanced for uninterrupted operation, with 80 PLUS Titanium efficiency, Cybenetics Titanium certification, active power factor correction, and a 135 mm fluid dynamic bearing fan that supports Zero RPM mode for quieter idling. Built-in protections such as overpower, overcurrent, overvoltage, undervoltage, short-circuit, surge, inrush, overheat, and no-load operation protection help safeguard components, while SiC MOSFETs and GPU Safeguard+ contribute to dependable power delivery for modern systems.
