DDR4 memory modules are a great solution for PCs. The DDR4 generation is the most popular format in the family of memory modules chosen by users today.

Ready to play

GOODRAM DDR4 memory has 4 GB, 8 GB, 16 GB or 32 GB of memory in single module. Up to 3200 MHz clock frequency makes GOODRAM great choice, no matter what kind of task is need to be done.

Highest quality = lifetime warranty

All GOODRAM memory modules are manufactured in Poland (Europe) with highly selected components and undergo a multi-stage quality tests before setting off for a trip to retail stores. The Quality Control Department ensures that each module is perfectly prepared for many years of use, thereby we guarantee our users a lifetime warranty.

Energy efficiency & stable operation

Compared to older technologies, DDR4 modules feature a supply voltage of 1.2V, which makes it possible to reduce device operating costs and increase power savings by up to 40% compared to the previous generation. Different, compared to older generation memory, the PCB design of DDR4 modules significantly increases resistance to mechanical damage as well as voltage spikes in the device. Thanks to this, DDR4 modules are

characterized by reliability, as well as stability of operation even in the least favorable operating conditions.
