Aprašymas

Energy savings of 37%

Save 37% on average on your energy consumption and reduce your carbon footprint with the Netatmo Smart Radiator Valves.

Remote control dashboard

Manage your home centrally from your smartphone. Change the temperature room-by-room from your bed or from anywhere in the world. Schedule your heating for your return from a holiday.

Room-by-room comfort

Fine-tune your comfort temperature room-by-room.

A room-by-room heating schedule

Benefit from a schedule based on your daily routine. Heat only when and where you need it.

Open Window Detection

When the Smart Radiator Valve detects a window is open, it switches off the heating in the room to prevent energy waste. Available soon.

Manual Boost

When needed, the temperature can be temporarily raised in a specific room for 3 hours.

Smart Regulation

The Smart Radiator Valve analyzes the room environment in real time and adjusts heating according to sunshine level and room use.

Techninė specifikacija
