TP-LINK's RE450 comes with next generation 802.11AC Wi-Fi technology, it's 3 times faster than the standard 802.11n speeds. The RE450 delivers fast speeds of dual band Wi-Fi up to 1750 Mbps, providing reliable connections for bandwidth-intensive tasks like HD/4K streaming, lag free gaming, large file downloads.

Gigabit Wired Speed

A gigabit Ethernet port turns the extender into a wireless bridge, letting you connect a wired device like a Blu-ray player, gaming console, DVR, or smart TV to your Wi-Fi network.

Easy Installation with RE Button

The extender RE450 works with any standard wireless router. Instantly connect the RE450 to a router by pressing the extender’s RE button followed by the router’s WPS button (if available).

Once connected with an existing router, you can take RE450 to an ideal place, no more further configurations.

Quick Positioning with Intelligent Signal Indicator

The Intelligent signal light can help to find the best location to place the extender.

High Speed Mode

High Speed mode maximizes overall performance by combining the bandwidth of both the 5GHz and 2.4GHz channels to create a lightning-fast connection with one band sending data and the other receiving it.
