The Lindy 65W USB Type A & C GaN Charger can charge two devices simultaneously. 65W Power Delivery and PPS are supported by the USB Type C port while the USB Type A port provides fast charging with up to 45W. When both ports are used in parallel a maximum power of 20W will be provided.

Featuring both a USB Type C female and a USB Type A female port this charger is ideal for use with most popular smartphones and iOS devices. Supporting power delivery of 65W and PPS (Programmable Power Supply), connected devices can be provided with faster and smarter charging than what is possible from a standard Type C charger supplied with many devices; it can modify voltage and current in real-time by feeding maximum power based on a device's charging status.

For safe charging the device includes overcharge, overcurrent, overtemperature and short circuit protection. As this charger is rated at Level 6 for efficiency, it also meets the highest current level of energy efficiency standards.
