Aprašymas

No port free?

This question is now settled! Generally, seven USB ports are sufficient to cover the plug-in requirements of all possible devices. Seven times data transfer rates of up to 5 Gbit/s are available here.

Power pack included

Conveniently, the power supply unit is included in the scope of delivery. It supplies 5 V/3 A, i.e. a total power of 15 watts. This is quite enough to supply all seven ports with sufficient energy.

Compact design

Simple and black, the handy hub fits into almost all work environments, even in terms of colour. The application is very simple: with Plug & Play, simply plug the connected power supply unit into a power outlet, an external device into a free USB slot and off you go. The USB cable to the host

computer is hard-wired to the hub and therefore cannot get lost.
