Aprašymas

A true multi-talent

The IB-HUB801-TB4 supports up to two 4K displays at 60 Hz in extended or mirrored mode, a single 8K display at 30 Hz or a 5K Thunderbolt™ display at 60 Hz. When external high-speed storage is connected, you get read speeds of up to 3000 MB/s.

Powerful when it matters

When you connect the hub to your notebook, your notebook can draw up to 85 watts of charging power via the Power Delivery feature when needed. With 85 watts notebook charging power, the IB-HUB801-TB4 outperforms most comparable Thunderbolt™ 4 hubs, which usually deliver up to 60 watts in comparison.

Daisy chain is back

Thunderbolt™ 4 supports high-resolution displays and high-performance data within one port, as well as connecting your computer to multiple devices via a daisy chain of cables. This also allows the hub to be daisy-chained with a larger DockingStation such as the IB-DK8801-TB4 for even more connections.
