The P23i i-Generation Long Range 21700 Tactical Flashlight is a newly designed member of the Precise Series. Utilizing a Luminus SFT-70 LED with an optical system combined with crystal coating and “Precision Digital Optics Technology” (PDOT), it has a max output of 3,000 lumens, ideal for law enforcement, assault operations, self-defense, search and patrols.

The P23i provides a max peak beam intensity of 55,300cd and max throw of 470 meters, suitable for different tasks like night searching and target distinguishing. Dual tail switches enable intuitive operations for tactical applications, like tactical momentary-on, constant-on and instant access to STROBE Mode for causing stronger dizzying effects. The 3-in-1 tactical u-shaped tail cap is compatible with a lanyard and can prevent accidental activation with tail stand capability. The strike bezel is designed with high hardness silicon nitride ceramics, which enables a quick and easy
