Aprašymas

Visualize your victory with the MSI G242L E14 gaming monitor. Equipped with a 1920 x 1080, 144hz Refresh rate, 1ms MPRT response time IPS panel, the G242L E14 will give you the competitive edge you need to take down your opponents. Built with Adaptive-Sync technology, the G242L E14 can match the display's refresh rate with your GPU for ultra-smooth gameplay. Make sure you can hit your mark with all the latest technologies built-in the MSI Gaming monitors for competitive play.

see every moment at its clearest

IPS display provides gamers with an 1ms MPRT response time, which will significantly reduce monitor blur occurrence. The crystal clear image will certainly give you a competitive edge for precise decisions in fast-moving games.

True color

The MSI Gaming Monitor has more gamut coverage compared to general monitors. Gameplay colors and details will look more realistic and refined, to push immersion to its limits.

SMOOTHEN OUT YOUR GAMEPLAY

Gaming shouldn't be a choice between choppy gameplay or broken frames. With MSI gaming monitors, it doesn't have to be. Get fluid, artifact-free performance at virtually any framerate with AMD FreeSync™ technology.

NIGHT VISION

Whether your entire screen is dark, or just a few portions have heavy shadows. Let the world's first smart black tuner brighten your day by bringing out the fine details in dark areas.

From Edge to Edge

With a super narrow bezel, enjoy the best immersion possible in the latest games with a multi-monitor 180 degree setup. Enjoy better continuity between screens while playing games, working, or general computing.

Anti-Flicker Technology

Generic monitor displays normally have a flicker-rate of about 200-times per second, which is unnoticeable to the naked eye, but can cause fatigue over time. MSI Anti-Flicker technology provides a very comfortable viewing experience by reducing the amount of flicker.

Blue Light Reduction

MSI monitors are optimized to produce less amount of blue light displayed by the monitor, so that you can game for longer periods of time without eye-fatigue.
