### **Cost-Efficiency**

Getting rid of extra cables and power adapters will save money on infrastructure.

### **Flexibility**

Deployment in complex situations is made possible by more placement possibilities.

### **Power Management**

Improves power usage while intelligently protecting your gadgets from power surges.

### **IEEE 802.3af/at**

PoE ports compliant with the 802.3af/at Powered Devices.

### **Traffic Separation**

With only one click, isolation mode divides traffic for ports 1-4 to prevent snooping/tampering and isolate broadcast storms for greater protection. MS106LP provides 2× uplink ports when turning on the isolation mode.

### **Port Prioritization**

Prioritizing the data of specific ports would ensure the high quality of delicate applications, such as voice and video, in crucial business domains.

### **PoE Auto Recovery**
