## Pagrindinės savybės

- ✓ Scratch-resistant: Thanks to the surface hardness of 10H, the tempered glass effectively protects against scratches, e.g. from keys or coins in your pocket
- ✓ Impact protection: The tempered glass protects the display with extra-hardened and rounded edges in the event of an impact or shock. Compatible with conventional protective cases
- ✓ Test-winning quality: Displex has been awarded test winner several times by specialist media. Our display protection is the best-selling in Germany
- ✓ Dirt-repellent: The high-tech anti-fingerprint coating ensures less dirt build-up on the protective film and optimal display sensitivity
- ✓ Perfect fit: The Displex Real Glass is optimally matched to the Galaxy S25 FE/S24 FE. The contours are specially designed and have precise openings for speakers and microphone, 3D/ Haptic Touch function (Apple) and the fingerprint sensors of all smartphone manufacturers are 100% supported
- ✓ Easy, bubble-free application: With the included Displex EASY-ON® Eco Mounting Frame (made of premium solid cardboard, 100% recyclable), applying the protective glass is easy, fast and bubble-free

## Aprašymas

Real Glass (2D) with EASY-ON® Eco Mounting Frame

Tempered glass with rounded edges

All Displex protective glasses have a surface hardness of 10H and are therefore not only more scratch-, break- and shock-resistant than comparable brand products, but even surpass sapphire glass, which is used in luxury watches and has a hardness of 9H.

Even the edges, the area of the smartphone and protective glass most susceptible to breakage and impact, are specially hardened, rounded by 4-fold polishing and finished with a shock-absorbing edge. This elaborate production process further increases the protection against knocks and bumps and allows a particularly pleasant use of the smartphone. With these features, the protective glass is extremely resistant and guarantees maximum breakage resistance.

#### Case-friendly

Our Displex protective glass is manufactured to within 5/100 mm of the smartphone contours and therefore fits perfectly on your smartphone. In addition, the protective film is ultra-thin at 3mm. This means that all standard-sized protective cases can be used with the screen protection glass. Thus, your smartphone is optimally protected all around by a combined protection of the Displex Tempered Glass and your favourite case.

#### Anti fingerprint coating

The top layer of our 4-Layer Technology is a high-tech plasma coating. With an extremely long-lasting effect, this coating effectively repels fingerprints. In addition, the plasma coating guarantees a soft scrolling experience. This technology not only makes your display look better, but it also keeps it cleaner and therefore requires less frequent cleaning.

#### High-tech splinter protection

The high-tech shatter protection integrated in the Real Glass from Displex guarantees absolute safety even if the protective glass breaks. Thanks to the composite material of the second layer in the protective glass, it does not shatter and thus guarantees absolutely safe use. If the worst should come to the worst and the protective glass has absorbed a blow, fall or impact and is broken, the Displex protective glass can be easily pulled off the display in one piece thanks to the integrated high-tech shatter protection.

#### High-performance adhesive

Once the protective glass has been fitted, the high-performance adhesive ensures optimum adhesion properties and a clear look. The adhesive is adapted to all display coatings of the various manufacturers so that the protective film for mobile phones holds reliably in the long term. The visual appearance is not affected either: despite the screen protection film, you can enjoy gripping videos and photos with maximum transparency and colour fidelity.

#### Simple & bubble-free application

With the EASY-ON® Eco Mounting Frame and the accompanying video tutorials, mounting the tempered glass is incredibly quick, easy and precise. In addition the EASY-ON® Eco Mounting Frame is made of premium solid cardboard and is therefore not only sustainable, but also a 100% recyclable. The result is worth seeing: no crooked positioning of the screen protector on the display, no concealed openings for speakers or microphones and certainly no bubbles under the protective glass.
