Pagrindinės savybės

- ✓ 360 Spatial Sound for Gaming
- ✓ Hear, react and respond first. By hearing the direction and distance of opponents, you'll always be one step ahead of your competition
- ✓ A sound field tailored to you
- ✓ The sounds you hear are impacted by the unique shape of your ear. By analysing not only the shape of the outer ear, but also the acoustic characteristics of the ear canal, the INZONE Buds offer more precise spatial sound
- ✓ The perfect audio for your ear shape
- ✓ Create a personalised hearing profile by taking photos of your ears using the 360 Spatial Sound Personalizer feature in the smartphone app. Then you can enjoy your game with unmatched spatial accuracy
- ✓ Optimised for your ear canal
- ✓ Each ear canal is unique, so headphone performance varies from person to person. INZONE Buds play test sounds from driver units and use feedback microphones to measure how the sound fills your ear canal. Based on the acoustic analysis, the sound is then personalised using the INZONE Hub PC application, ensuring a truly personalised spatial listening experience
- ✓ Be fully immersed in the gaming experience
- ✓ By faithfully reproducing every sound within the game, from powerful explosions to subtle footsteps, you'll feel transported into the world of the game. This is made possible through a specially engineered Dynamic Driver X unit that is designed for wide frequency reproduction, and which is also used for WF-1000XM5. The diaphragm structure, which utilises different materials for both the dome and edge, ensures minimal distortion and a clear sound quality, delivering an unparalleled level of auditory realism

Aprašymas

Your compact competitive edge

INZONE Buds Truly Wireless Noise Cancelling Gaming Earbuds

INZONE Buds are designed for serious gaming with long battery life and low latency with the included USB-C dongle. They can also be directly connected to your Android smartphone with LE Audio (Regular Bluetooth is not supported).
