The Ubiquiti UFiber WiFi6 is designed to elevate connectivity experience, combining reliable performance with advanced features. This wireless router operates across 2.4 GHz and 5 GHz bands, delivering maximum data rates of 300 Mbps and 1.2 Gbps respectively. With its powerful MIPS 1004Kc processor running at 900 MHz and 256 MB of RAM, it ensures smooth operations for all Internet needs while supporting a wide range of networking protocols including Wi-Fi 6, providing robust connectivity for multiple devices. It is equipped with essential features such as firewall protection, NAT support, and VLAN support to secure and manage the network effectively. Additionally, the integrated switch offers four ports for wired connections, making it versatile and functional for various setups. The device is built for reliability and adaptability, functioning within an operating temperature range of -15°C to 45°C and a humidity range of 10% to 90% (non-

condensing). Its sleek desktop form factor allows easy placement in any environment, while passive
