The Ubiquiti UniFi Cloud Key G2+ is a remote control device designed for seamless network management. Featuring a compact external form factor, it connects easily via wired Ethernet and supports Power over Ethernet (PoE) for simple installation. With a USB-C port and a microSD card slot, it offers flexibility for data storage and device management. Operating in a range of environmental conditions, this device ensures reliability with a wide humidity tolerance and maximum operating temperature of 35 °C.

Equipped with power status indicators and firmware upgradability, the Cloud Key G2+ keeps its performance aligned with evolving network trends. Its anodized aluminum housing provides durability and assists in heat dissipation. USB Quick Charge 3.0 compliance allows for quick recharging, making it a practical option for dynamic networking environments.

Product Description: Ubiquiti UniFi Cloud Key G2+ - remote control device | Device Type: Remote control device | Form Factor: External | Data Link Protocol: Ethernet, Fast Ethernet, Gigabit Ethernet | Power Over Ethernet (PoE) Supported: PoE | Dimensions (WxDxH): 13.12 cm x 13.42 cm x 2.71 cm | Weight: 560 g
