Pagrindinės savybės

- ✓ Long Range and Self-Centering Capability
- ✓ High-Precision Hall Sensor
- ✓ Aerospace-Grade CNC Aluminum Alloy
- ✓ Extension Functionality
- ✓ Locking Mechanism

Aprašymas

Long Range and Self-Centering Capability

The MOZA Z-axis module functions as a yaw control axis with a $\pm 20^\circ$ range, accommodating almost all aircraft models. It automatically returns to center when unloaded.

High-Precision Hall Sensor

Equipped with a 16-bit high-precision Hall sensor, the module detects and controls rotation with an accuracy of up to 0.005° . Its contactless design ensures stable and durable performance over time.

Aerospace-Grade CNC Aluminum Alloy

Crafted entirely from aerospace-grade aluminum alloy using CNC machining and anodized surface treatment, the module offers robust durability and a premium metallic feel.

Extension Functionality

The module can be used as an extension kit, adding 97mm in length to enhance the realism and professional feel of the flight experience.

Locking Mechanism

It features a locking mechanism that disables the Z-axis function when only the extension function is needed.

Easy Installation

Installation is straightforward: simply attach and hand-tighten the nut above the mounting stick for quick setup.

Open Ecosystem Compatibility

Compatible with the MOZA ecosystem and some third-party options, it provides versatility in setup configurations.

Techninė specifikacija

Savybės	
Gaminio tipas	Z ašies modulis
Produkto spalva	Juoda
Medžiaga	Aliuminis
Svoris ir matmenys	
Plotis	110 mm
Ilgis	47,5 mm
Aukštis	47,5 mm
Svoris	260 g
