Carlinkit CPC200-Tbox S Carplay&Android Auto wireless adapter

The Carlinkit CPC200-Tbox S is a wireless adapter that will change your driving experience. It allows you to wirelessly use CarPlay or Android Auto without having to connect your phone with a cable. The device runs on Android 13.0 and is equipped with a powerful Qualcomm SM6115 processor for smooth operation. With its compact design and easy installation, it is ideal for drivers who appreciate convenience and versatility while traveling.

Performance and smooth operation

The adapter features a quad-core Qualcomm SM6115 processor, which combines Kryo Gold and Kryo Silver cores clocked at up to 2.0 GHz. This, along with 4GB or 8GB of RAM and Adreno 610 graphics,

makes the device run extremely smoothly, even when using more demanding applications. In addition, the device offers 64 GB or 128 GB of internal memory, which can be expanded by an additional 512 GB thanks to a TF card slot. The ability to download apps directly from the store allows you to customize the device for everything from navigation to entertainment.

Compatibility

The Carlinkit CPC200-Tbox S provides seamless operation for both iOS and Android users. The device is compatible with wireless CarPlay, which supports iPhones from model 6 and up, and Android Auto, which works with devices from Android 11 and above. This means you no longer need to connect your phone with a wire to your car - just make sure your vehicle supports the factory's wired CarPlay or Android Auto, and the adapter will allow for a quick wireless connection. The adapter offers auto-switching between systems to ensure smooth and seamless operation.

Multimedia features

The Carlinkit CPC200-Tbox S adapter is not only a convenient integration of the phone with the car system, but also a powerful multimedia platform. It allows you to play movies, listen to music and access a variety of applications directly on the car screen. You can enjoy popular streaming services such as Netflix, YouTube, Spotify and HBO Max, as well as social media applications such as Facebook and TikTok. What's more, the device supports a wide range of Bluetooth wireless accessories, up to tire pressure monitoring and OBD systems. This allows you to further expand the functionality of your vehicle, customizing it to your needs and preferences.

Connectivity and navigation

The device supports dual-band Wi-Fi (2.4 GHz and 5.8 GHz), as well as Bluetooth 4.2 and 5.0, allowing a stable connection to your phone and other devices. In addition, WiFi hotspot support allows you to access the Internet on the go. The adapter has a SIM card slot, so you can use the 4G network directly from your device. In addition, the built-in navigation system with support for GPS, Glonass and Beidou provides precise positioning so you can easily reach your destination.

Modern solutions and convenience
