

VIOFO A329 1CH 4K 60FPS WiFi, GPS

Modelis: A329 1CH

Gamintojas: VIOFO

EAN: 6972147074654

Prekės kodas: 70252

327.99€

VIOFO A329 1CH 4K 60FPS WiFi, GPS video recorder

VIOFO A329 video recorder is an advanced device that introduces a new quality in recording events on the road. Thanks to 4K recording at 60 frames per second and the use of the Sony STARVIS 2 sensor, the device provides outstanding image clarity both during the day and at night. Innovative technologies such as Wi-Fi 6, external SSD support and advanced parking mode make the A329 not just a camera, but a comprehensive tool for monitoring your vehicle.

Excellent image quality thanks to Sony STARVIS 2 technology

The A329 is equipped with a Sony STARVIS 2 IMX687 sensor, which guarantees images with exceptional detail and less noise, even in low-light conditions. Recording in 4K at 60 fps allows you to capture every detail of fast-moving objects, such as license plates and pedestrians. In addition, the HDR function balances light and dark areas for clear images in any situation.

Advanced parking mode with event buffering

The A329 monitors your vehicle even when it is stationary. Parking mode with event buffering automatically records events from 15 seconds before and 30 seconds after motion is detected. You can also use time-lapse mode, which records video at a selected rate (e.g. 1/2/3/5/10 fps), saving memory card space and power.

Innovative technologies for better performance

The first 4K 60 fps video recorder with Wi-Fi 6 technology offers three times faster data transmission. It takes less than 10 seconds to download a one-minute video in 4K, which is extremely convenient in emergency situations. The USB 3.0 connector allows for fast downloads and software updates (with compatible devices).

Support for external SSD drives

The VIOFO A329 is an innovative model that supports external SSD drives, allowing you to store recordings from more than three weeks of travel. The ability to copy files from an SD card to an SSD relieves the burden on the memory card, increasing its lifespan and data security.

Additional features for added convenience

With the built-in GPS module, you can track your location, speed and travel time in the VIOFO app. In addition, the Bluetooth remote allows you to easily secure recordings and take photos without taking your hands off the wheel (remote sold separately). Voice support in multiple languages allows you to control the device with simple commands for added safety and comfort.

With long-term operation in mind

The A329 supports loop recording, automatically overwriting the oldest recordings. A built-in G-sensor protects key recordings in the event of a collision, and a CPL filter reduces glare for even better image quality.
