VIOFO A119 V3-G 2K 60FPS GPS video recorder

VIOFO A119 V3-G is a reliable device that will meet the expectations of any driver. The video recorder is equipped with a Sony STARVIS 5MP sensor, and offers high quality 2K QHD recording at 60 fps. It has a 24-hour parking mode with three recording modes, a built-in G-sensor, an auto-lock emergency recording function, and a GPS recorder to record location and speed. Thanks to the super-capacitor, it is more resistant to temperature extremes, and the rotating lens and wide 140° viewing angle guarantee precise image capture. Bet on professionalism and choose VIOFO!

Amazing video quality

Equipped with a 5-megapixel Sony STARVIS sensor, the A119 V3 delivers crisp, vivid video in 2K QHD resolution at 60 fps, with more detailed images and key details in all lighting conditions. This means that no important information will escape your attention, and you can enjoy safe driving every day.

Multiple exposure and wide viewing angle

Thanks to advanced multiple exposure technology, the A119 V3 offers a wider range of brightness levels to restore true image quality and solve overexposure problems at night. This treatment makes it possible to clearly capture license plates and other key features, regardless of road conditions. In addition, the 140° viewing angle and rotating lens provide a wide recording field with minimal edge-to-edge distortion. The VIOFO video recorder is a guarantee of reliable operation, whenever you need it.

24/7 parking mode

The VIOFO video recorder offers three parking modes. Auto Event Detection automatically records a 35-second clip when motion is detected. The buffering function starts recording 5 seconds before and ends 30 seconds after the event occurs. Timelapse Recording mode records video at a reduced frame rate (1 / 2 / 3 / 5 / 10 fps) without sound, saving both power and memory card space. With Low Bitrate Recording mode, you can count on continuous recording of small file sizes along with sound, which also helps save more space on the MicroSD card.

Automatic locking of emergency recordings

The built-in G-sensor automatically locks the recording in the event of a shock or collision, preventing important moments from being overwritten during loop recording. Three G-sensor sensitivity levels are available: low, medium and high. To save an important moment or an interesting view from your route, all it takes is one click of the emergency button. It's a simple way for you to always be prepared during unpleasant situations on the road.

Reliable super-capacitor and GPS recorder

Thanks to its super-capacitor, the A119 V3 can withstand extreme cold and high temperatures, providing greater safety and longer life compared to battery or rechargeable video recorders. In addition, the built-in GPS logger allows you to record detailed location, speed and time data, which opens up your access to the information when playing back your recordings. Note: If you use the VIOFO app to play back video and view the GPS map, download the video of your choice first.

Included

- video recorder
- car charger
- mini USB cable
- holder (without GPS) 2x
- GPS holder
- spare mounting stickers
- clips
- EVA foam
- trim removal tool
- 2x windshield static sticker
- instruction manual

Manufacturer	VIOFO
Model	A119 V3-G
Matrix	5 MP Sony STARVIS
Video resolution	2K QHD (2560×1440) at 60 fps
Viewing angle	140° with minimal distortion at the edges
Lens adjustment	Supported, swivel lens
Parking mode	3 modes (automatic event detection, time-lapse recording, low bit rate recording)
Safety features	Automatic recording lock (emergency lock), emergency button (emergency button)
Additional security features	Super capacitor resistant to high and low temperatures (65°C and -10°C)
GPS	built-in
Dedicated application	VIOFO
