Aprašymas

Disk festival ground

Built-in a 3.5" drive bay, each HDD has its own bay, in which it's easily mounted and removed again. The installation and removal of hard drives happens without tools.

Better safe than sorry

Both HDD trays can be opened or locked separately. No unauthorized person has access to the hard drives. Internally, the mobile rack is connected via 2x SATA connectors. For the LED displays, there are two separate 4-pin connectors.

Cooling and stable

The casing is mainly made of metal, wherein the front panel is still extra-high-quality aluminum. Metals are known for their excellent thermal conductivity (passive convection). This ensures a certain coolness, without making the mobile rack loud.
